

LUCIANO**FACCHINI**[®]
EXCLUSIVE DESIGN

The passion for design led me as a self-taught to study and design various products, in a short time I achieved important results thanks to international projects. The attention to design research and the passion for design is aimed at leaving a mark that characterizes it in every single project, passion and research, wisely combined with the skills that make up the work team I manage, the collaborators are all great passionate and work with the aim of always finding functional solutions. I always aim to insert an innate Italian style into my DNA of every single project. This has become my hallmark. I am currently starting to look at new technologies so that I can always have a high level professionalism. My goal is to create exclusive and highly innovative products in the design sector. I represent the perfect combination of the ability to design cutting-edge products and the creative flair to find new ways to make each product distinctive and exclusive.

I represent the synthesis of doing and being.

Luciano Facchini

YACHT DESIGN

INDUSTRIAL DESIGN

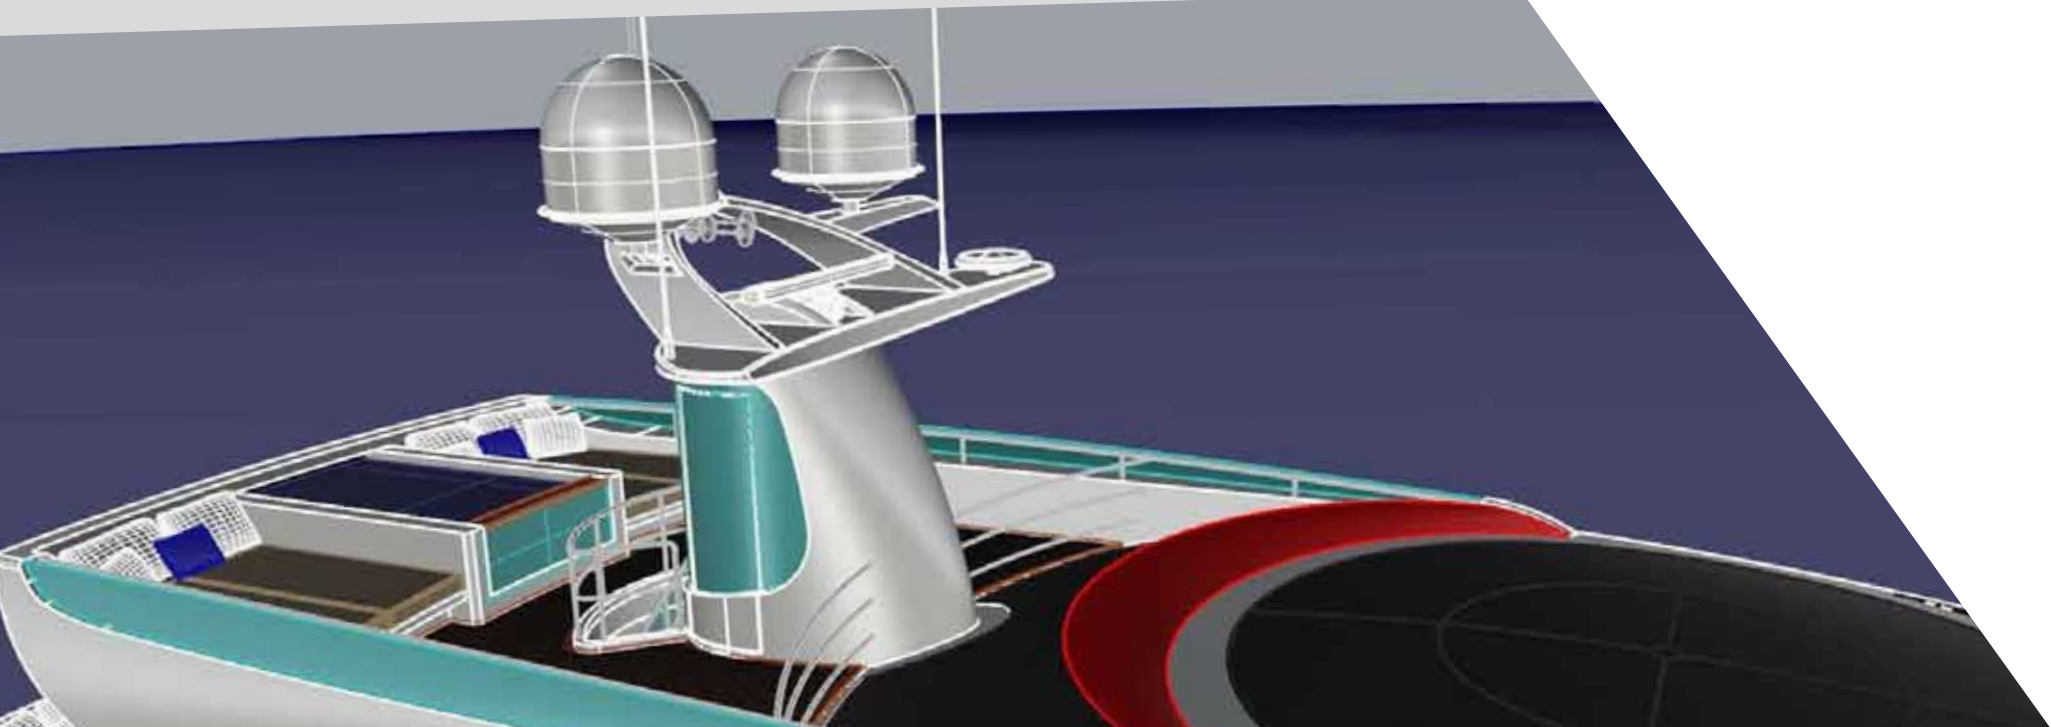

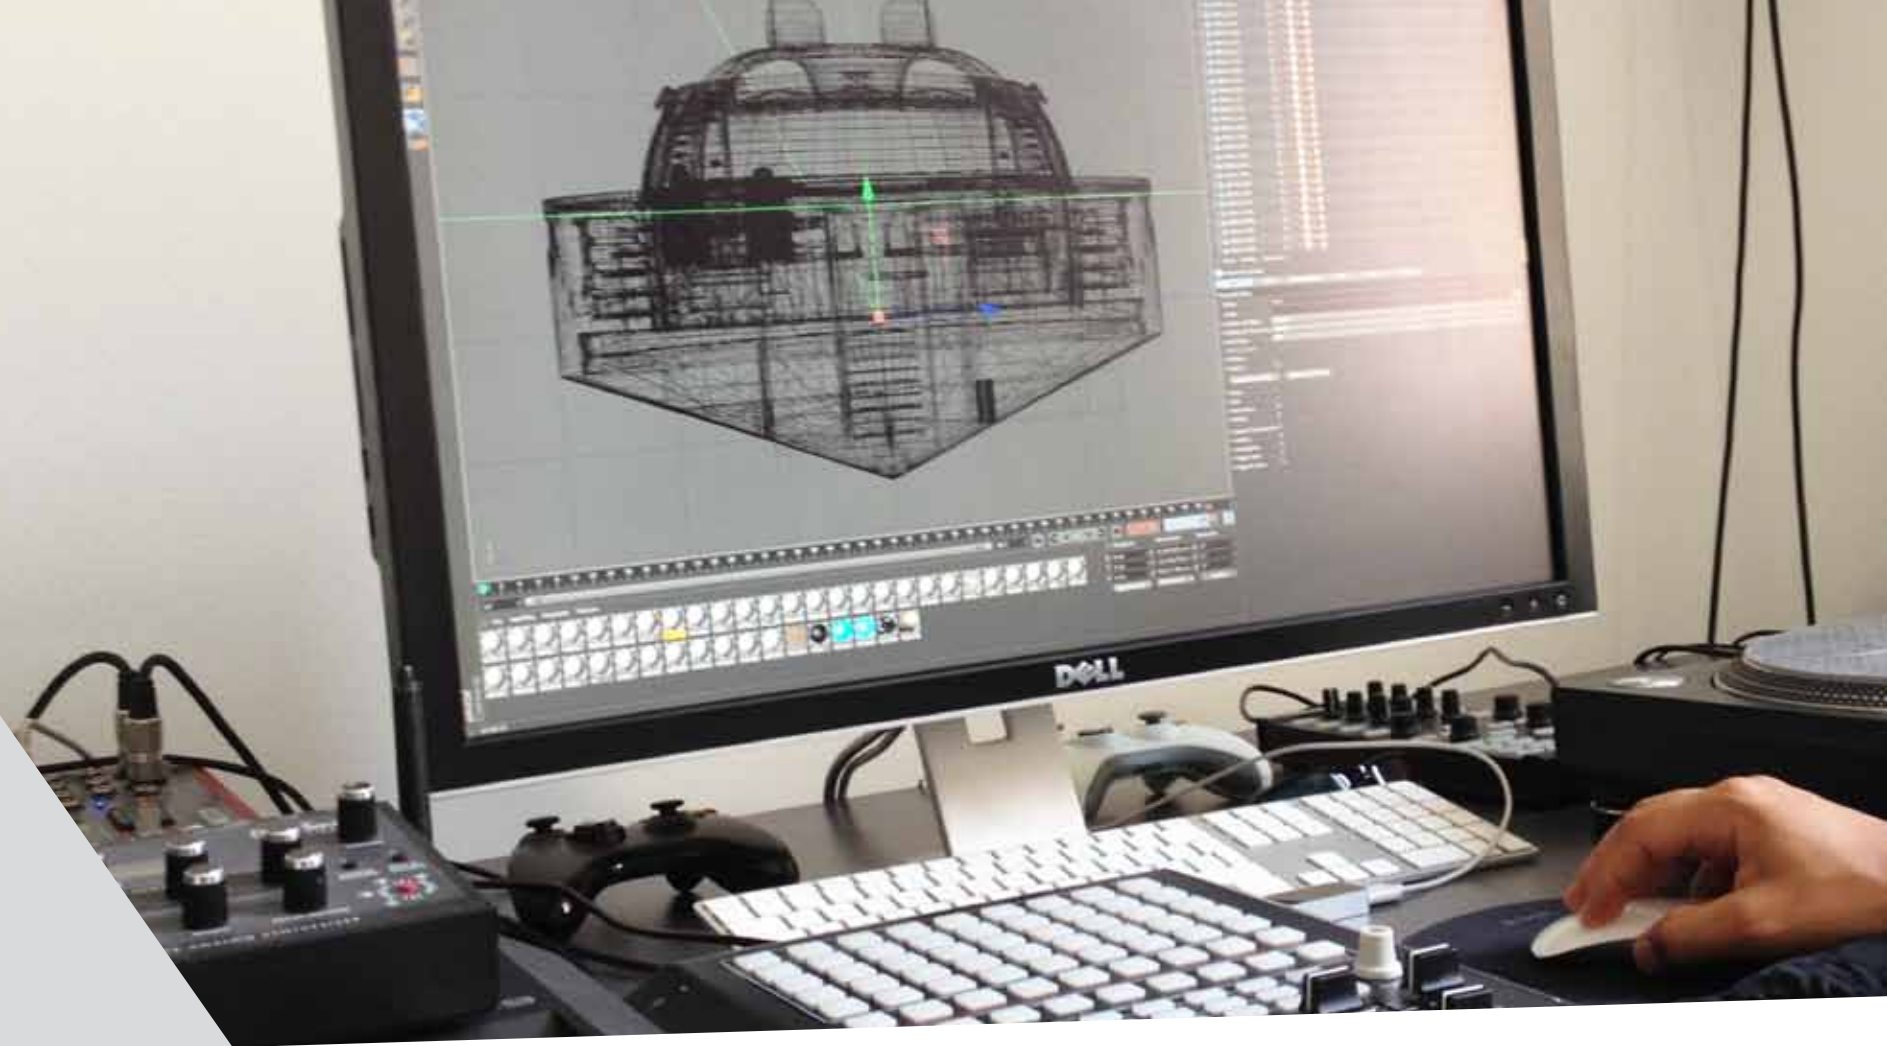

CONCEPT DESIGN

CREATIVITY

WE ARE YOUNG
BUT WE'VE GOT BROAD
SHOULDERS

Our background is from the world of racing, and whenever possible we look for ways to integrate this know-how to add something to ensure the product is of the very highest quality, using our knowledge of different materials such as carbon and titanium and the aerodynamics studies. Research on materials and forms goes into every design project, whether it is for a sofa or a touch screen dashboard, nothing is left to chance. We aim to surprise every time.

WE LOVE TECHNOLOGY AND MATERIALS
SUCH AS CARBON AND TITANIUM,
WE KNOW HOW TO GIVE THE RIGHT SHAPE
TO ENHANCE EVERY TYPE OF PROJECT.

Our team is made up of top-level professionals, project managers, aerospace materials specialists, experts in latest generation home automation. And they all have a common element... the passion for this work, and to create an excellent product together.

OUR PROJECTS NEVER GO UNNOTICED

 ALDEBARAN

24_{MT}

45_{MT}

WE CREATED
A NEW CATEGORY OF YACHT
WITH UNBELIEVABLE CONTENTS

The Aldebaran project developed from a need to create a new type of high performance luxury boat. We wanted to create a new category, bringing together the ultimate in aerodynamics and the power of F1 offshore boats while also drawing on the world of luxury yachts to obtain the maximum regarding comfort and exclusivity of line and materials. This all contributes to creating a product of the highest technological content which is an expression of Italian design.

WHATEVER THE PROJECT
WE AIM TO IDENTIFY SOME FEATURE
TO MAKE IT STAND OUT EVEN AFTER YEARS

We are always on the lookout for new skills and best qualified to ensure our team of professionals consists of the very best talents from all over the world thanks to an extensive network of collaborators which we constantly update. All of this helps to satisfy the continued evolution of the market.

Astrea is not a simple evolution of a project, Astrea has been designed, redesigned to be a yacht with exaggerated performance, a 30 meter yacht where aerodynamics are extreme but without losing sailing comfort. A blade that cuts the air with the utmost luxury and the most advanced technology.

A CONCENTRATE OF TECHNOLOGY
WITH INCREDIBLE PERFORMANCE
IN MAXIMUM LUXURY

LINES THAT RECALL MARINE
NATURE, AND MORE. WE WANT
TO COMBINE A HIGH-TECH SHELL
WITH TIMELESS MODERN LINES.

Great elegance, latest generation technologies, great respect for the environment.
These are our development guidelines for each individual project.

EXPLORER GLADIATOR

Every shape we recreate has a meaning, nothing is thought of without having a specific function. We always refer to the modern but without losing its identity. Everything must be in contact with the sea that surrounds us to experience it to the fullest.

WHEN IT COMES TO A RESTYLING,
WE DON'T TRANSFORM IT COMPLETELY
BUT WE LEAVE IT ITS IDENTITY,
WE ONLY MAKE IT BETTER IN ALL ITS FORMS.

ST 60 MULTI MISSION INTERCEPTOR

SuperTermoliPower boat, the Greek-based shipyard specializing in fast military motorboats. ST 60 has been developed to create an incredibly performing powerboat, combining armor studied in its aerodynamics and modular weapons system where it is possible to equip ST with different electronic aiming systems and new generation weapons. An unstoppable "beast" in combat and extreme reconnaissance.

ST 60

AN UNSTOPPABLE "BEAST" IN COMBAT
AND EXTREME RECONNAISSANCE
THROUGH ITS STEALTH TECHNOLOGICAL
SOUL. WHERE EVERY DETAIL FROM
THE ARMOR TO THE WEAPONS
IS DEVELOPED WITH THE LATEST
MILITARY TECHNOLOGIES

SUPERTERMOLI POWERBOATS

ST 50 USV DRONE

With SuperTermoliPower boat, ST 50 is also being developed, an incredibly performing 15-meter drone, studied in its aerodynamics similar to the ST 60 and with a modular weapon system where it is possible to equip the ST 50 with different weapon systems and new generation visors. A remotely piloted “terminator drone” unstoppable in combat and extreme reconnaissance.

THE EVOLUTION OF WAR MACHINES
RESTARTS WITH THE NEW ST 50,
A “TERMINATOR” DRONE, WHERE WE
HAVE DESIGNED A PERFECT MACHINE
FOR EXTREME PATROLS AND RAIDS
WITH THE USE OF THE LATEST MILITARY
TECHNOLOGIES ON THE MARKET.

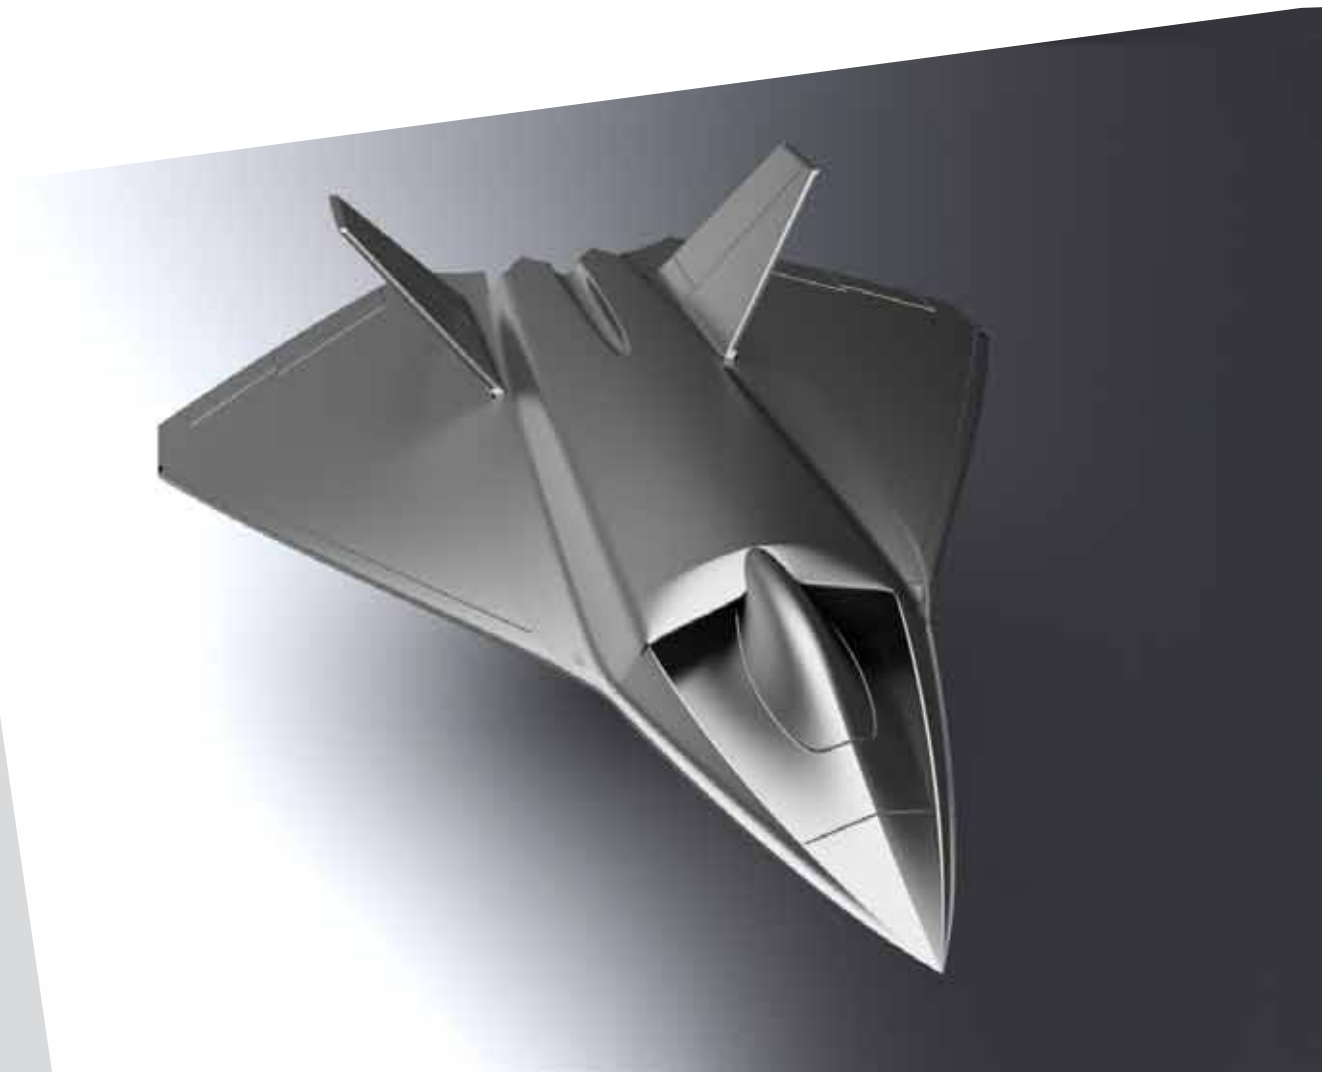

FX- 01 STEALTH FIGHTER CONCEPT

Modern military fighters have the possibility of having completely distorted lines and shapes compared to the past, there is a tendency to make them “unstable” but thanks to electronics and artificial intelligence, all these variables make modern aircraft true predators of the air. It is on this that we base ourselves, making volumes, shapes, extreme but always identifiable lines to give each single project a matrix that bears our design as a recognizable and highly modern element.

FOR EACH PROJECT WE ALWAYS LOOK FOR THE
FEATURE THAT MAKES THE DIFFERENCE, WE STUDY
EVERY SINGLE AIR FLOW, EXTREME SHAPES TO ALWAYS
GIVE THE PRODUCT MAXIMUM FUNCTIONALITY IN
EVERY SITUATION, WHETHER IT IS DEFENSE OR ATTACK,
IT MUST ALWAYS HAVE MAXIMUM EFFICIENCY.

LUCIANO FACCHINI

W MOTORS

A study on a restyling of the already performing Lykan by W Motors, a study aimed at researching new and increasingly clear lines and looking for a new even more aggressive front end that a predator likes. A development that also involved the convertible version, immediately making it an object of extreme beauty.

RESEARCH OF DETAIL, EXTREME
RESEARCH OF AN IMMEDIATELY
RECOGNIZABLE STYLE AND
A REFINED AERODYNAMIC
RESEARCH ON EVERY SINGLE
ELEMENT.

LUCIANO FACCHINI

The Montecarlo Tender yacht car is a project which was developed with Evotek Engineering, a well-known company specialising in the design and prototyping of high performance vehicles and in the production of “one-offs”.

Starting from a Smart concept, a high performance vehicle but with reduced size and weight is being developed using hi-tech materials and the latest generation electronics.

Every accessory makes the Montecarlo an absolutely unique product, not only in the yachting world.

“MONTECARLO YACHT TENDER CAR”,
THE VEHICLE WHICH ADAPTS TO
YOUR DRIVING STYLE
AT THE TOUCH OF A BUTTON

EXCLUSIVITY
AND TECHNOLOGY
CONCEIVED TO AMAZE
EVEN IN THE MOST
DEMANDING SITUATIONS

The Montecarlo must excite for both the driving experience and in its aesthetics. Every detail is studied with the engineers and using 3D designs and testing we are able to evaluate the different solutions to be developed within Evotek and also with external partners. Lights, colours, materials, the layout of every individual object are painstakingly designed and checked with all the different production departments.

The SYM simulator for Formula 1 was an opportunity along with Evotek to take part in a truly ambitious project of the highest level, where we developed a product which has now been ranked among the best 100 highest technological objects in the luxury sector. It is a product which is continuously evolving both stylistically and technologically, and we are proud to have participated in such a project!

OUR DESIGN IS A FAST RUNNER
ALL OVER THE WORLD

Our collaboration with Malaguti, the historical company based in Bologna, was a unique experience. We have worked together for a number of years, and with our specially designed graphics we contributed to dozens of models of scooters, a symbol and memory for all the teenagers of an era which we are proud to have been a part of.

THE SCOOTER THAT MADE
THE HISTORY OF ITALIAN KIDS,
ICONS OF ITALIAN STYLE AND
DEDICATED GRAPHICS AMONG
THE MOST BEAUTIFUL ON THE MARKET.

LOTS OF LITTLE SUCCESSES EXPERIENCED
ALONG ROADS ALL OVER THE WORLD

We were motorcyclists, off-roading was our first love for two wheels and then it evolved into road motorcycling. For us, the graphics, like the style of the motorbike, are a decisive element to give to every project.

FOR US, RESEARCH IS ESSENTIAL
TO FIND THE TRUE ESSENCE OF
ANY MOTORCYCLE WE DEVELOP.

DEVELOPING ATTRACTIVE
GRAPHICS IS NO LONGER
A GAME FOR US

We know how important making a good impression with a smart outfit is – even more so for the graphic design of product, without a smart “outfit” even the best product lacks market appeal, making it less attractive and the public will fail to understand its full potential. Over time we have studied and developed graphics which are always modern and up-to-date.

EVEN FOR RESTYLING
WE TAKE THE LEAD
AND WE'RE PROUD OF IT

Like beautiful women, all products need a little make-up to ensure they always look their very best and up-to-date. In some cases a restyling might focus merely on small details in others it might be more radical highlighting a new look to keep pace with the times.

WE BELIEVE THAT DESIGN MUST
HAVE LINES THAT COME FROM THE FUTURE

For our projects, nothing is left to chance. We do simulation after simulation to avoid every single problem, everything is done in maximum functionality, and its design must be memorable. Each member of the team knows that these rules are the basis for us on every project, whether it is a yacht, a racing motorboat or a supercar.

WE WANT TO GIVE MAXIMUM
DYNAMISM TO EVERY OBJECT
WE DESIGN ...ALWAYS!

In our projects we want to be courageous, we take inspiration from nature, each line of our design is designed to always give an excellent functional result. Every single element is analyzed and studied in detail, nothing is left to chance.

We get excited about anything that can be designed and elaborated upon and we've got other projects in mind - not just boats and cars. Now we hope that we've helped you to understand how much passion we put into our work, we are a young team, but with a strong desire to grow and show our distinct voice. We hope that our next project will be with you and that we can create something outstanding.

OUR DESIGN COVERS 360°
AND IT'S ALWAYS ON THE MOVE
